A person, being a nominee, becoming entitled to the NCDs by reason of the death of the NCD Holder(s), shall be entitled to the same rights to which he would be entitled if he were the registered holder of the NCD. Where the nominee is a minor, the NCD Holder(s) may make a nomination to appoint, in the prescribed manner, any person to become entitled to the NCDs, in the event of the NCD Holder's death, during the minority of the nominee. A nomination shall stand rescinded upon sale of the NCDs by the person nominating. A buyer will be entitled to make a fresh nomination in the manner prescribed. When the NCDs are held by two or more persons, the nominee shall become entitled to receive the amount only on the demise of all such NCD Holders. Fresh nominations can be made only in the prescribed form available on request at our Registered/ Corporate Office, at such other addresses as may be notified by us, or at the office of the Registrar to the Issue or the transfer agent.

NCD Holders are advised to provide the specimen signature of the nominee to us to expedite the transmission of the NCDs to the nominee in the event of demise of the NCD Holders. The signature can be provided in the Application Form or subsequently at the time of making fresh nominations. This facility of providing the specimen signature of the nominee is purely optional.

In accordance with the Section 72 read with Rules under Chapter IV of Companies Act, 2013, any person who becomes a nominee by virtue of the above said Section, shall upon the production of such evidence as may be required by our Board, elect either:

- (a) To register himself or herself as the holder of the NCDs; or

A person, being a nominee, becoming entitled to Secured NCDs by reason of the death of the Secured NCD Holder shall be entitled to the same interests and other advantages to which he would have been entitled to if he were the registered Secured NCD Holder except that he shall not, before being registered as a Secured NCD Holder in respect of such Secured NCDs, be entitled in respect of these Secured NCDs to exercise any right conferred by subscription to the same in relation to meetings of

the Secured NCD Holders convened by the Company. A nomination may be cancelled or varied by nominating any other person in place of the present nominee, by the Secured NCD Holder who has made the nomination, by giving a notice of such cancellation or variation in the prescribed manner as per applicable laws. The cancellation or variation shall take effect from the date on which the notice of such variation or cancellation is received.

Since the allotment of Secured NCDs will be made only in dematerialized mode, there is no need to make a separate nomination with our Company. Nominations registered with the respective Depository Participant of the Applicant would prevail. If the investors require changing their nomination, they are requested to inform their respective Depository Participant.

A. Lending Policy

Gold Loan Business

Our core business is disbursement of Gold Loans, which are typically small ticket loans collateralized by gold jewelry.

Loan disbursement process:

The principal form of collateral accepted by us is gold jewelry. The amount that we finance against the security of gold jewelry is typically based on the value of the jewelry. We value the gold jewelry brought by our Gold Loan customers based on our centralized policies and guidelines, including policy on fixing interest rates. In terms of the extant RBI guidelines, we currently lend up to 75.00% of the previous 30 days average closing gold price of 22 carat gold of the gold content in the jewelry. We appraise the jewelry collateral solely based on the weight of its gold content, excluding weight and value of the stone studded in the jewelry. Our Gold Loans are therefore well collateralized because the actual value of the collateral in all cases will be higher than the underlying loan value at the time of loan disbursement.

The amount we lend against an item and the total value of the collateral we hold fluctuates according to the gold prices. However, an increase in gold price will not result automatically in an increase in our Gold Loan portfolio unless the per gram rate are revised by our corporate office. Similarly, since adequate margins are kept at the time of disbursement of loan, a decrease in the price of gold has little impact on our interest income from our existing loan portfolio. However, a sustained decrease in the market price of gold can cause a decrease in the size of our loan portfolio and our interest income.

We rely on the disposition of collateral to recover the principal amount of an overdue Gold Loan and the interest due thereon. We also have recourse against the customers for the Gold Loans taken by them. Since the disbursement of loans is primarily based on the value of collateral, the customer's creditworthiness is not a factor in the loan decision. However, we comply with KYC norms adopted by the Board and require proof of identification and address proof which are carefully documented and recorded. We also photograph customers with web-cameras installed in our branches.

All our Gold Loans have a maximum 12 month term. However, customers may redeem the loan at any time, and our Gold Loans are generally redeemed between 90 and 180 days. Interest is required to be paid only when the principal is repaid. However, the borrower has the flexibility to pay the interest or principal partly at any time. In the event that

a loan is not repaid on time and after providing due notice to the customer, the unredeemed collateral is disposed of in satisfaction of the principal and all interest charges. In general, collateral is disposed of only when the recoverable amount is equal to or more than the realizable value of the collateral.

Loan appraisal process:

Our Gold Loan approval process is generally linked with the appraisal of gold jewelry that serves as collateral, which takes only a few minutes. Each of our branches is staffed with persons who have been trained and have experience in appraising the gold content of jewelry. The appraisal process begins with weighing the jewelry using calibrated weighing machines. Jewelry is then subject to prescribed primary tests for the quality of gold, including stone tests and acid tests, followed by additional tests, if required, such as salt tests, sound tests, weight tests, pointed scratching tests, flexibility tests, color tests, smell tests, usability tests, magnifying glass tests and finishing tests. Once the jewelry passes these tests, loans are disbursed based on the rates per gram of gold as approved by the corporate office. Although disbursement time may vary depending on the loan ticket size and the number of items pledged, we usually are able to disburse an average loan ticket size of ₹ 20,000.0 in five minutes to repeat customers from the time the gold is tendered to the appraiser, except in case of first time customer where it may take up to half an hour for carrying out one-time-compliance with the KYC norms. While our customers are provided the option to accept loan disbursements in cash or by cheque or electronic mode, almost all of our customers prefer disbursements in cash.

At the time of disbursement, an undertaking is signed by the customer. It states the name and address of our Company's relevant branch office and the customer, a detailed description of the gold jewelry provided as collateral, the amount of the loan, the interest rate, the date of the loan, and other terms and conditions.

Where the responsibility for compliance with applicable law relating to loan appraisal and disbursement lies with us, we are in compliance with the IT Act and other related provisions.

Training:

Our ability to timely appraise the quality of the gold jewelry collateral is critical to the business, and requires us to employ persons possessing specialized skill sets in our various branches. We provide extensive training to our branch employees through training programs that are tailored to appraising the gold content in gold jewelry. A new employee is introduced to the business through an orientation program and through training programs covering job-appropriate topics. The experienced branch employee receives additional training and an introduction to the fundamentals of management to acquire the skills necessary to move into management positions within the organization. Manager training involves a program that includes additional management principles and more extensive training in topics such as income maximization, business development, staff motivation, customer relations and cost efficiency. We have regional training centers at each of our regional offices to provide training to new recruits as well as refresher training to existing employees.

Post-disbursement process:

Custody of gold collateral

The pledged gold jewelry is separately packed by the staff of the branch, and then placed in a polythene pouch with the relevant documents on the loan and the customer and stored in the safe or strong room of the branch.

The safes and strong rooms in which the gold jewelry is kept are built as per industry standards and practices. The strong rooms are vaults with reinforced concrete cement structures. Currently, almost all of our branches are using strong rooms.

Inventory control

The pledged gold jewelry packed in pouches is identified by loan details marked on the cover. Tamper proof stickers are affixed on the jewelry packets to ensure inventory control. Additional stickers are used to seal packets by persons examining packages subsequently, including our internal auditors

Branch security and safety measures

Ensuring the safety and security of the branch premises is vital to our business since our cash reserves and gold inventory are stored in each branch. Our branch security measures mainly comprise the following:

Burglar alarms

Burglar alarms are installed in all branches.

Security guards

Security guards are deployed in branches where management perceive there to be heightened security risks.

Surveillance camera

We have installed surveillance cameras in all our branches across India.

Release of the pledge:

We monitor our gold loan accounts and recovery of dues on an ongoing basis. Once a loan is fully repaid, the pledged gold jewelry is returned to the customer. When a customer does not repay a loan on or before its maturity, we initiate the recovery process and dispose of the collateral to satisfy the amount owed to us, including both the principal and the accrued interests. Before starting the recovery process, we inform the customer through registered letters or legal notices.

When a loan is repaid, we give the customer an option to pledge the security again and obtain another loan. The procedure of re-pledging entails the same procedure as that of a pledge and is accompanied by the same mode of documentation that a pledge entails. If the loan is not repaid when the loan falls due, we are able to sell the gold collateral through public auction in satisfaction of the amount due to us.

We also reserve the right to sell the collateral even before a loan becomes past due in the event the market value of the applicable portion of the underlying collateral is less than amounts outstanding on the loan, after serving notice to the customer.

Unsecured Loans

We have started providing unsecured personal loans to salaried individuals and unsecured loans to traders and self employed. Personal loans are extended mainly to salaried employees of Public Sector units, other reputed institutions and self-employed individuals. The loans will be granted for meeting any personal purposes including consumption needs. Business Loans to traders and self employed include loans to Wholesale and retail traders, Self-employed professionals like allopathic doctors, chartered accountants, company secretaries and architects etc. Such loans are extended for any genuine business purpose like working capital requirements, acquisition /repair/ renovation of fixed assets/ equipments / machinery etc.

Collections/Recovery

Our credit department assigns interest collection targets for each branch, reviews performance against targets, makes visits to the branches, and advises on timely corrective measures and repossession action. We also have procedures in place to penalize branches for loans overdue beyond three months. We maintain strict control over recovery procedures followed in our various branches by linking employee compensation to the performance of the branch (loans disbursed, NPA/Stage 3 asset levels, etc.) in which the employee is working. Once repossession is advised by our credit department, we conduct public auctions of the jewelry collateral after serving requisite legal notices.

Risk Management

Risk management forms an integral element of our business strategy. As a lending institution, we are exposed to various risks that are related to our gold lending business and operating environment. Our objective in risk management processes is to appreciate measure and monitor the various risks we are subject to and to follow the policies and procedures to address these risks. The Company's Risk Management Committee of the Board of Directors constituted in accordance with the Reserve Bank of India regulations has overall responsibility for overseeing the implementation of the Risk Management Policy. The committee meets at least twice in a year to review the Risk Management practices. Risk Management department periodically places its report to the committee for review. The committee's suggestions for improving the Risk Management Practices are implemented by the Risk Management department. Risk Management department shall be responsible for the following:

- a) Identifying the various risks associated with the activities of the Company and assessing their impact on the business.
- b) Measuring the risks and suggesting measures to effectively mitigate the risks.

However, the primary responsibility for managing the various risks on a day to day basis will be with the heads of the respective business units of the Company. The major types of risk we face are collateral risk, operational risk, liquidity risk, market risk (which includes interest rate risk), Foreign currency risk, Prepayment risk and Business cycle risk.

Collateral risk

Collateral risk arises from the decline in the value of the gold collateral due to fluctuation in gold prices. This risk is in part mitigated by a minimum 25% margin retained on the value of jewelry for the purpose of calculation of the loan amount. Further, we appraise the jewelry collateral solely based on the weight of its gold content, excluding weight and value of the stone studded in the jewelry. In addition, the sentimental value of the gold jewelry to the customers may induce repayment and redemption of the collateral even if the value of the collateral falls below the value of the repayment amount. An occasional decrease in gold prices will not increase collateral risk significantly on account of our adequate collateral security margins. However, a sustained decrease in the market price of gold can additionally cause a decrease in the size of our loan portfolio and our interest income.

Credit risk

Credit risk is the possibility of loss due to the failure of any counterparty to abide by the terms and conditions of any financial contract with us. We aim to reduce credit risk through a rigorous loan approval and collateral appraisal process, as well as a strong NPA/Stage 3 assets monitoring and collection strategy. This risk is diminished because the gold jewelry used as collateral for our loans can be readily liquidated, and in light of the fact that we do not lend more than 75% of the value of the collateral retained, the risk of recovering less than the amounts due to us is quite remote.

Operational risk

Operational risk is broadly defined as the risk of direct or indirect loss due to the failure of systems, people or processes, or due to external events. We have instituted a series of checks and balances, including an operating manual, and both internal and external audit reviews. Although we disburse loans in very short periods of time, we have clearly defined appraisal methods as well as KYC compliance procedures in place to mitigate operational risks. Any loss on account of failure by employees to comply with defined appraisal mechanism is recovered out of their variable incentive. We also have detailed guidelines on physical movement and security measures in connection with cash or gold. We have also introduced centralized software which automates inter-branch transactions, enabling branches to be monitored centrally and thus reducing the risk of un-reconciled entries. In addition, we have installed surveillance cameras across our various branches, and subscribe to insurance covers for employee theft or fraud and burglary. Our internal audit department and our centralized monitoring systems assist in the management of operational risk.

Market risk

Market risk refers to potential losses arising from the movement in market values of interest rates in our business. The objective of market risk management is to avoid excessive exposure of our earnings and equity to loss and to reduce our exposure to the volatility inherent in financial instruments. The majority of our borrowings, and all the loans and advances we make, are at fixed rates of interest. Our interest rate risk is therefore minimal at present.

Liquidity risk

Liquidity risk is the risk of being unable to raise necessary funds from the market at optimal costs to meet operational and debt servicing requirements. The purpose of liquidity management is to ensure sufficient cash flow to meet all financial commitments and to capitalize on opportunities for business expansion. An Asset and Liabilities Committee (“ALCO”) meeting is held regularly to review the liquidity position based on future cash flow. In addition, we also track the potential impact of prepayment of loans at a realistic estimate of our near to medium-term liquidity position. We have developed and implemented comprehensive policies and procedures to identify, monitor and manage liquidity risks. The nature of our business is such that our source of funds (proceeds from the issue of debentures and term loans) has longer maturities than the loans and advances we make, resulting in low liquidity risk in our operations.

Foreign currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. Foreign currency risk for the Company arises majorly on account of foreign currency borrowings. The Company’s foreign currency exposures are managed in accordance with its Foreign Exchange Risk Management Policy which has been approved by its Board of Directors. The Company has hedged its foreign currency risk on its foreign currency borrowings as on March 31, 2021 by entering into cross currency swaps and forward contracts. The counterparties for such hedge transactions are banks.

Prepayment risk

Prepayment risk is the risk that the Company will incur a financial loss because its customers and counterparties repay or request repayment earlier or later than expected, such as fixed rate loans when interest rates fall.

Business cycle risk

Business cycle risk is the risk associated with the seasonal or cyclical nature of a business. As our customers include both individuals and business and our loan products are used by customers in various industries, trade cycles have limited impact on our business. Furthermore, the geographic spread of our branches will allow us to mitigate the cyclical pressures in the economic development of different regions.

Asset and Liability Management

ALCO monitors and manages our day to day asset and liability mix. ALM committee of Board of Directors, will have overall responsibility of monitoring, supervision and control of the Asset and Liability Management mechanism. Most of our liabilities are short-to-medium-term and assets are short-term. We may in the future decide to pursue loan products with longer term maturities. We have a structural liquidity management system which measures our liquidity positions on an ongoing basis and also scrutinizes the reasons behind liquidity requirements evolving under different assumptions. For measuring net funding requirements, we prepare regular maturity gap analyses and use a maturity ladder to calculate the cumulative surplus or deficit of funds at selected maturity dates. Based on this analysis we re-price its assets and liabilities.

Technology

We use information technology as a strategic tool for our business operations to improve our overall productivity and efficiency. We believe that through our information systems which are currently in place, we are able to manage our nationwide operations efficiently, market effectively to our target customers, and effectively monitor and control risks. We believe that this system has improved customer service by reducing transaction time and has allowed us to manage loan-collection efforts better and to comply with regulatory record-keeping and reporting requirements.

All our branches are computerised. We have used the power of information technology in our operations to improve our customer services, efficiency and management information systems. In March 2013, we developed a powerful, user-friendly core banking solution (“CBS”) and implemented the solution in all our branches across India. This solution has been designed and developed to meet our business requirements. The CBS takes care of centralized transaction processing, back-office and management information system across our branches and offices. The main objective of the CBS is to provide ubiquitous services to customers and enhance convenience, along with providing better control and cost-effectiveness to the Company. CBS has been rolled out with transaction processing and back-office functionalities so as to allow branches to provide fast and convenient services to customers.

Security Threats and Measures

The security threats we face can be broadly classified as external and internal threats. The principal security risks to our operations are robbery (external threat) and employee theft or fraud (internal threat). We have extensive security and surveillance systems and dedicated security personnel to counter external security threats. To mitigate internal threats, we undertake careful pre-employment screening, including obtaining references before appointment. We also have installed management information systems to minimize the scope for employee theft or fraud. We also have installed offsite surveillance cameras across our branches, which is connected to a centrally located database and allow the regional office / corporate office to remotely monitor the branches.

To protect against robbery, all branch employees work behind wooden, glass and steel counters, and the back office, strong-room and computer areas are locked and closed to customers. Each branch’s security measures include strong rooms with concrete walls, strong room door made of iron bars, burglary alarm systems, controlled entry to teller areas, and the tracking of employee movement in and out of secured areas. While we provide around the clock armed security guards for risk prone branches, the majority of our branches do not require security guards as the gold jewelry are stored securely in strong rooms.

Since we handle high volumes of cash and gold jewelry at our locations, daily monitoring, spot audits and immediate responses to irregularities are critical to our operations. We have an internal auditing program that includes unannounced branch audits and cash counts at randomly selected branches.

Rationale

The rating action considers Muthoot Finance Limited's (MFL) healthy financial risk profile and the scale-up in its consolidated portfolio, which was largely led by the gold loan business. MFL's gold loan book has more than doubled over the last five years to Rs. 54,214.9 crore as of December 2021 and accounted for ~90% of its consolidated portfolio. The ratings continue to factor in MFL's long track record and its leadership position in the gold loan segment, its established franchise with a pan-India branch network, and its efficient internal controls and monitoring systems. MFL's ability to raise funds from diverse sources and the short-term nature of the loans result in a strong liquidity profile.

ICRA, however, takes note of the performance of the non-gold segments, which are of a relatively lower vintage; the sustained good quality growth and earnings performance of these segments would remain a monitorable. Some of the asset segments, namely microfinance (6% of the consolidated AUM¹ as of December 2021), vehicle finance (0.4%) and affordable housing (3%) recorded higher gross stage 3 (GS3) of 5.5%, 12.4% and 4.4%, respectively, vis-à-vis 3.8% in the gold loan segment as of December 2021 (GS3 at 0.9% in March 2021). ICRA takes note of the sizeable gold loan auctions undertaken by MFL in 9M FY2022 (~Rs. 3,111 crore, largely in Q3 FY2022) vis-à-vis FY2021 and FY2020, largely on account of the loan origination in Q1/Q2 FY2021 when gold prices were high. The average portfolio loan-to-value (LTV) moderated to 69% in December 2021 from 73%

¹ Assets under management

in September 2021 (65% in December 2020 and 61% in September 2020). ICRA expects the auctions to remain elevated in the remaining part of the current fiscal in case the company is unable to achieve recoveries from its overdues via normal collections.

The credit costs in the gold loan business have, however, remained under control in the past, which supported the consolidated earnings performance (PAT/AMA² in the range of 5.5-6.5% during FY2018 to 9M FY2022). Improvement in the operating efficiency also supported the earnings profile in FY2021 and 9M FY2022, while the company faced a moderation in margins. ICRA expects the consolidated earnings performance to remain healthy as gold loans would account for 85-90% of the overall lending portfolio and recoveries from overdues are expected to be good, which would keep the credit costs under control. MFL's capitalisation profile, characterised by a consolidated managed gearing³ of 3.0 times as of December 2021 (range of 3.0-3.5 times over the last 3-4 years), is expected to remain comfortable over the medium term supported by the expected healthy accruals.

ICRA takes note of the geographical concentration of the branches and the loan book in South India. South India accounts for 60% of MFL's gold loan branches, contributing ~50% to the gold loan book. A demonstrated track record in the non-gold segments and a steady improvement in geographical diversity would be key, going forward, from a rating perspective.

The Stable outlook factors in ICRA's expectation that MFL will continue to benefit from its established operational track record in the gold loan business, which is expected to account for 85-90% of the consolidated AUM over the medium term, and its comfortable overall financial risk profile.

ICRA has also reaffirmed and withdrawn the long-term rating on the Rs. 473.63-crore non-convertible debenture (NCD) programme and Rs. 28.91-crore subordinated debt programme in accordance with ICRA's policy on the withdrawal of credit ratings as the instruments have matured and have been fully repaid.

Key rating drivers and their description

Credit strengths

Established franchise and leadership position in gold loan segment – MFL has a track record of around two decades in the gold loan business and is India's largest gold loan focussed non-banking financial company (NBFC) with a total portfolio of Rs. 54,688 crore (of which 99% is gold loan) as on December 31, 2021; the portfolio grew by 8.5% on a year-on-year (YoY) basis. The consolidated portfolio stood at Rs. 60,896 crore in December 2021 compared to Rs. 55,800 crore in December 2020, of which gold, microfinance and housing accounted for 90%, 6% and 3%, respectively.

As on December 31, 2021, MFL had an extensive pan-India network of 4,617 branches; 60% of its branches are in South India, where it has an established franchise. The strong brand value of Muthoot, its experienced promoters and senior management team, and its efficient internal controls and audit systems are expected to support the overall business growth going forward.

Track record of healthy earnings performance – The company's consolidated net profitability remained healthy with the annualised PAT/AMA at 5.7% in 9M FY2022 and 6.1% in FY2021 (6.5% in FY2020). The consolidated net profitability remained in the range of 5.5-6.5% between FY2018 and 9M FY2022. The annualised net interest margin was lower in 9M FY2022 and FY2021 at 10.7% and 11.4%, respectively, vis-à-vis ~13% and 12.9% in FY2020 and FY2019, respectively, because of the higher on-balance sheet liquidity as well as the reduction in loan yields. The operating profitability, however, was supported by the improvement in the operating cost ratio to 2.9% in 9M FY2022 (3.3% in FY2021) from 4.3-4.6% during FY2017-FY2020. The

² Profit after tax/(Total assets including off-book AUM)

³ Managed gearing = (borrowings + off-book AUM)/net worth

earnings performance continues to be supported by the low credit costs (less than 1% over the last 10 years and average of 0.4%) in the gold loan business. ICRA expects the net profitability to stabilise at 5.0% over the medium term.

MFL's (standalone) net profitability was 6.1% in 9M FY2022 and 6.5% in FY2021 (6.8% in FY2020). The annualised return on average net worth (standalone) was 24.5% in 9M FY2022 (27.8% and 28.3% in FY2021 and FY2020, respectively).

Capitalisation to remain comfortable over the medium term – MFL has a comfortable capitalisation profile with a standalone gearing of 2.8 times and 3.1 times as on December 31, 2021 and March 31, 2021 (3.2 times as on March 31, 2020), respectively, aided by good internal capital generation. The consolidated managed gearing stood at 3.0 times as of December 2021. MFL's standalone net worth was Rs. 17,412.2 crore as on December 31, 2021 (Rs. 15,238.9 crore as on March 31, 2021). The company is expected to be comfortably placed to meet the medium-term capital requirements of its subsidiaries without affecting its own capital structure. ICRA expects MFL's consolidated managed gearing to remain in the range of 3.5-4.0 times over the medium term.

Credit challenges

Performance of non-gold segments to remain a monitorable; sizeable share of gold loans would support overall portfolio quality – MFL's standalone portfolio almost entirely consists of gold loans and it has diversified its exposure via its subsidiaries, namely Belstar Microfinance Limited (Belstar; microfinance), Muthoot Homefin (India) Limited (MHL; affordable housing) and Muthoot Money Limited (MML; vehicle finance). The consolidated portfolio is currently concentrated towards gold loans, comprising 90% of the loan book while microfinance, affordable housing and vehicle finance accounted for 6.3%, 2.6% and 0.4%, respectively, as on December 31, 2021.

The loan books of MHL and MML declined by 16% and 44%, respectively, on a YoY basis due to the Covid-19 pandemic, while Belstar registered a YoY growth of 33%. The subsidiaries faced higher overdues with the GS3 of Belstar, MHL and MML standing at 5.5%, 4.4% and 12.4%, respectively, in December 2021 vis-à-vis 2.4%, 4.0% and 8.6%, respectively, in March 2021. The performance of the non-gold segments was impacted by the Covid-19-related disruptions because of the unsecured nature of the microfinance business and the average credit profile of the borrowers in the housing and vehicle finance segments.

MFL's GS3, however, was relatively lower at 3.8% in December 2021 (0.9% in March 2021) but increased in 9M FY2022 due to the second wave of the pandemic and borrower-level stress. ICRA notes the company's track record in containing credit costs in the gold segment and achieving recoveries in auctions where it typically recovers the principal and a sizeable share of the accrued interest on such loans. Gold loan auctions undertaken by MFL in 9M FY2022 stood at 6% (not annualised) of the opening portfolio vis-à-vis 0.4% in FY2021 (1.7% in FY2020). The company undertook sizeable auctions in Q3 FY2022. The price of gold declined in H2 FY2021 from the peak level in August 2020 and was ~15% lower as of March 2021. While the price improved from the March 2021 level, it remained range-bound in 9M FY2022 and was lower than August 2020 by ~10%. Consequently, the share of AUM with LTV of more than 75% increased in September 2021 vis-à-vis the September 2020 level. The weighted average LTV for gold loans increased to 73% as of September 2021 (75% as of March 2021) from ~61% as on September 30, 2020; this moderated to 69% in December 2021 on account of the recovery measures followed by the company including auctions. ICRA, therefore, expects auctions to remain higher in the remaining part of the year in case MFL is unable to achieve recoveries from its overdue loan accounts via normal repayments.

ICRA expects MFL's asset quality in the gold loan segment, which accounts for the bulk of the consolidated AUM, to remain under control with low credit costs. The overall asset quality and credit costs are expected to remain under control as the subsidiaries are expected to account for 10-15% of the consolidated portfolio over the medium term. MFL's ability to profitably grow its non-gold businesses while maintaining good asset quality would be crucial over the medium to long term, considering the unsecured nature of some of these businesses and the higher inherent risks in these segments compared to gold loans.

Operations concentrated in South India – MFL’s operations are largely concentrated in South India, which constituted 60% of its total branch network and 50% of its total gold loan portfolio as on December 31, 2021. ICRA, however, notes that the share of the portfolio in South India has reduced from 57% in March 2015. Geographical diversification is expected to improve steadily over the medium to long term with an improvement in the scale of the gold loan portfolio and the stabilisation of the performance of the non-gold asset segments.

Liquidity position: Strong

MFL had cash and liquid investments of Rs. 5,385 crore as on February 11, 2022, with a payment obligation of Rs. 8,325 crore between February 12, 2022 and April 30, 2022. A sizeable portion of the repayments (Rs. 5,770 crore) comprise cash credit/short-term loans from banks, which are expected to be rolled over, while the commercial paper (CP), NCD and term loan repayments are Rs. 866 crore, Rs. 523 crore and Rs. 1,166 crore, respectively, during the above-mentioned period. Undrawn working capital and term loan limits from banks (~Rs. 1,560 crore as of February 2022) provide further support to the company’s liquidity profile.

MFL has a fairly diversified funding profile with bank/financial institution (FI) loans constituting 52% of its total borrowings as on December 31, 2021, followed by NCDs (26%), external commercial borrowings (ECBs; 16%), CP (2%) and subordinated debt (0.4%). Diverse funding sources help the company maintain a comfortable liquidity position.

Rating sensitivities

Positive factors – ICRA could change the outlook or upgrade the rating if MFL sustains a comfortable overall asset quality and capital profile over the medium to long term. A long track record of good performance in the non-gold segments and improvement in geographical diversity would also positively impact the rating.

Negative factors – ICRA could change the outlook or downgrade MFL’s ratings if the share of the unsecured assets segment goes beyond 15% or the asset quality weakens significantly, thereby impacting the earnings. An increase in the consolidated gearing beyond 4.5 times on a sustained basis would also negatively impact the ratings.
